**SCIT- DATA SCIENCES AND ANALYTICS INFO:**

Have you studied Mathematics as a subject in 12th Standard?

**SNAP Exam Appearing City:**

Preference 1

Pune - Maharashtra

Preference 2

Mumbai - Maharashtra

Preference 3

Nashik - Maharashtra

Additional details	
<b>Blood Group</b>	A +ve
<b>Hobbies</b>	
My hobbies are Computer Tinkering, Coin collecting (numismatics), Computer programming, Competitive Video Gaming and Streaming, Weight Training & Reading about new Technology.	
<b>Achievement in Sports:</b>	
<b>Achievement Level in Sports</b>	Awards won at School Level
<b>Achievements Description in Sports</b>	
For my participation in inter-school roller skating competition.	
<b>Achievement in Academics:</b>	
<b>Achievement Level in Academics</b>	Awards won at School Level
<b>Achievements Description in Academics</b>	
For scoring 90 in Maths and 92 in Science in my 10th standard board exam.	
<b>Achievement in Extra Curricular Activities:</b>	
<b>Achievement Level</b>	Awards won at School Level
<b>Achievements Description</b>	
For my participation in dance competition in my school's Annual Day function.	
<b>Other Details:</b>	
<b>Awards/ Medals/ Scholarships Received</b>	
Medal won for achieving second place in my class in Abacus Advance level 4 conducted by SIP Academy.	
<b>Briefly describe yourself by elaborating on your strengths and weaknesses.</b>	
I am a quick learner and a good problem solver. I am also organized in my work. And also, one of my main strengths is technology and I am a very tech-savvy person. My weaknesses are that I am too critical of other people's work and I am a little sensitive. For instance, whenever I am doing a group project, I try to complete the task in the best possible way and if someone else's work is not up to the mark, I get slightly annoyed. I am trying to overcome this by seeing things from the other person's perspective and this has helped me to not overreact.	
<b>What new skills have you developed in the recent past (2 years)? How have you utilized them?</b>	
Most of my skills that I have developed in the past 2 years is through my college coursework. However, I took up some online education courses such as Python and Cybersecurity and I have also attended tech events for Ethical Hacking and Linux specialization which have helped me to improve my coding abilities. I was able to use my coding skills in a project that I worked on where I have developed a Super Local Aggregator Model for Travel Agents. I have also developed my professional skills by taking up a professional course called SEAL. And I have also volunteered in events held in my college that has helped me to improve my ability to manage time and other people and my ability to work in a team. This has greatly helped me during my group projects and presentations which requires one to work in a team and have good communication.	
<b>What are your goals in life and how MBA going to help you achieve them?</b>	
One of my main goals in life is to launch my own startup in the tech field. To achieve this my first goal is to gain as much knowledge and experience in the Computer Science field. Although, I have learned the basics of computer science during my BCS course, I want to gain more knowledge in computer programming and its applications by learning advance computer courses such as Cloud Programming, Deep Learning, Systems Programming and other advance topics. And I think this course will help me in learning them and which in turn will help build my career. This course will also increase my opportunity to work and gain experience in a reputed company in the IT sector which is one of my medium-term goals.	
<b>State a challenging situation that you have encountered in your personal/professional life and what were the two major lessons learnt?</b>	
I have encountered a few challenging situations in my life but one of the most challenging situations I can think of is when it was just 3 days left to submit my college assignment but my partner had got sick and his part of the assignment was incomplete. As he was the only one who knew how to do it but was not there to help me, I had to learn his part in just 3 days and complete the assignment. I learned that one should be prepared to face any challenges in their life and never give up and instead overcome the challenges by trying to complete them in the best way possible.	
<b>Have you completed any online certificate program from SIBM Pune</b>	No
<b>If YES Give the Registration Number</b>	
<b>Have you shortlisted for M.B.A. (INNOVATION AND ENTREPRENEURSHIP) programme?</b>	No
